Reasons for allowance

1. Claims 1-35 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a drive mechanism provided in a connecting portion to move a first optical element by relatively moving a first holding portion and the connection portion (claims 1, 29, 30, 31 and 33) as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

3. Receipt is acknowledged of paper submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

4. Acknowledgment is made of receipt of Applicant's Information Disclosure Statement (PTO-1449) filed 5/25/2001.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Merz (6307688) is cited for disclosing an optical system, in particular projection unit used in microlithography, Weber (6271976) is cited for disclosing an apparatus for tilting an object about at least one axis, in particular an optical element, Watson (6239924) is cited for disclosing a kinematic lens mounting with distributed support and radial flexure, Sudo (6122114) is cited for disclosing an optical element supporting device and optical apparatus, Hale (5986827) is cited for disclosing a precision tip tilt piston actuator that provides exact constrain, Ikeda (5638223) is cited for disclosing a projection type exposure apparatus and method with detachable and attachable lens barrel unit, Balogh (5521764) is cited for disclosing a device for lateral adjustment of lenses in a high performance lens system. Perry (5070489) is cited for disclosing a driving circuit for double solenoid focus actuator, but neither of the above cited prior art discloses the claim limitation of present application.
